

VORG COURSE 1 WORKBOOK

Luxury Fashion Compositing Taste

Real-image master studies. Exact observation. Controlled reconstruction. Original VORG capstone.

How to use this workbook

Weekly study hours and fixed practice blocks

Software installed and version

Storage and backup plan

How weekly self-critiques will be saved

Private master-study rules

- ☐ Use only official, attributed references.
- ☐ Keep replicas private and educational.
- ☐ Do not remove logos or credits.
- ☐ Do not publish a brand replica as VORG work.
- ☐ Use VORG-owned photos and products for the capstone.
- ☐ Do not use generated imagery as the practice target.

Assignment scorecard

Composition and hierarchy /20

Lighting logic /15

Material realism /15

Perspective and scale /15

Shadow and reflection integration /15

Color discipline /10

Product truth /5 and VORG originality /5

Full image teardown

Three-second read

Hierarchy and focal point

Composition and shape language

Camera estimate

Lighting estimate

Surface language

Composition grid

Use the grid to trace large shapes, horizon, subject axis, and negative space.

Crop alternatives

Use the grid to trace large shapes, horizon, subject axis, and negative space.

Lighting map

Key direction, size, height, softness

Fill and negative fill

Shadow density and edge

Highlight shape and likely reflected card

What is inferred vs. proven

Material analysis

Material and expected behavior

Diffuse / specular / transmission clues

Roughness and coat estimate

Microtexture and controlled imperfections

How the environment appears in the surface

Color palette exercise

Dominant hue

Supporting hue

Accent hue

Skin / product / background relationship

Black-point and highlight color

What to desaturate first

Camera estimate

Aspect ratio and crop

Horizon and camera height

Estimated focal length and why

Camera-to-subject distance

Perspective and distortion clues

What evidence would confirm the estimate

Photoshop layer plan

00-03: reference, RAW, cleanup, mask

04-08: CGI, shadows, reflections, light wrap, color

09-12: dodge/burn, texture, grade, output

Linked files and Smart Objects

Blender scene plan

Plate, dimensions, and camera metadata

Real-world scale anchors

Objects and measured bevels

Lights, cards, and environment

Passes, masks, and output settings

Resolve node plan

Input transform / color management

Balance and contrast

Skin or product isolation

Look and saturation hierarchy

Grain, output, and shot match

Shot planning

Commercial job and output ratios

Hero product and supporting elements

Location / background / weather

Camera, lens, height, and distance

Lighting diagram and references

Clean plates and backup shots

CGI realism checklist

- ☐ Perspective and scale match.
- ☐ Contact shadow exists and shares the light.
- ☐ Cast-shadow direction and softness match.
- ☐ Reflections contain the plate environment.
- ☐ Depth of field and edge acuity match.
- ☐ Grain scale matches the final output.
- ☐ Bevels and normals produce physical highlights.
- ☐ Microtexture is controlled.
- ☐ Black and white levels share the plate.
- ☐ Object survives a 200 percent review.

Product-truth checklist

- ☐ Garment silhouette is unchanged.
- ☐ Fit and body relationship are accurate.
- ☐ Color matches the approved product.
- ☐ Seams, labels, hardware, and texture remain accurate.
- ☐ No anatomy or identity change.
- ☐ No invented material behavior.
- ☐ No misleading water, gloss, or performance claim.
- ☐ Before/after comparison is archived.

Self-critique

Intended visual idea

What should be noticed first

Reference principle studied

What was reconstructed technically

What remains visibly fake

What a professional art director would remove

Master study J01 - Le Bonheur - white/red look

https://www.jacquemus.com/en_us/%22le-bonheur%22/lebonheur.html

Three-second read

Three largest shapes and values

Camera and lighting estimate

Surface and color clues

Rebuild plan

What not to copy or publish

Master study J02 - La Croisiere - architectural set

https://www.jacquemus.com/en_us/collections/collections-jacquemus-page.html

Three-second read

Three largest shapes and values

Camera and lighting estimate

Surface and color clues

Rebuild plan

What not to copy or publish

Master study J03 - La Casa - model and architecture

https://www.jacquemus.com/en_us/collections/collections-jacquemus-page.html

Three-second read

Three largest shapes and values

Camera and lighting estimate

Surface and color clues

Rebuild plan

What not to copy or publish

Master study R01 - Glazing Milk - hero study

<https://www.rhodeskin.com/products/glazing-milk>

Three-second read

Three largest shapes and values

Camera and lighting estimate

Surface and color clues

Rebuild plan

What not to copy or publish

Master study R02 - Glazing Milk - clean still life

<https://www.rhodeskin.com/products/glazing-milk>

Three-second read

Three largest shapes and values

Camera and lighting estimate

Surface and color clues

Rebuild plan

What not to copy or publish

Master study R03 - Highlight Milk - skin/product crop

<https://www.rhodeskin.com/products/highlight-milk-02>

Three-second read

Three largest shapes and values

Camera and lighting estimate

Surface and color clues

Rebuild plan

What not to copy or publish

Week 1 - Taste library

Required result: Seven teardowns + one chosen master study

Outcome for this week

Daily practice blocks

Reference chosen and why

Technical risk

Deliverable

Score and revision decision

Week 2 - Photography test

Required result: RAW model plate + RAW product plate + reference captures

Outcome for this week

Daily practice blocks

Reference chosen and why

Technical risk

Deliverable

Score and revision decision

Week 3 - Shine lab

Required result: Three highlight shapes + black-denim and white-product tests

Outcome for this week

Daily practice blocks

Reference chosen and why

Technical risk

Deliverable

Score and revision decision

Week 4 - Blender composite

Required result: Camera match + materials + passes + first integration

Outcome for this week

Daily practice blocks

Reference chosen and why

Technical risk

Deliverable

Score and revision decision

Week 5 - Photoshop breakdown

Required result: Layered composite + before/after + realism fixes

Outcome for this week

Daily practice blocks

Reference chosen and why

Technical risk

Deliverable

Score and revision decision

Week 6 - Color consistency

Required result: Three balanced frames + one repeatable look

Outcome for this week

Daily practice blocks

Reference chosen and why

Technical risk

Deliverable

Score and revision decision

Week 7 - Motion and QA

Required result: Six-second teaser + campaign match audit

Outcome for this week

Daily practice blocks

Reference chosen and why

Technical risk

Deliverable

Score and revision decision

Week 8 - Capstone

Required result: Six masters + adaptations + final self-critique

Outcome for this week

Daily practice blocks

Reference chosen and why

Technical risk

Deliverable

Score and revision decision

Daily taste journal - Day 1

Target time: 15-25 minutes. Stop when the observation is clear.

Source image and URL

Three-second read: first event / second event / emotion

Three largest value groups

Estimated lens, camera height, and key-light direction

Dominant / supporting / accent color

One unnecessary element

Why it feels expensive or cheap

One original VORG application • not a copied layout

Daily taste journal - Day 2

Target time: 15-25 minutes. Stop when the observation is clear.

Source image and URL

Three-second read: first event / second event / emotion

Three largest value groups

Estimated lens, camera height, and key-light direction

Dominant / supporting / accent color

One unnecessary element

Why it feels expensive or cheap

One original VORG application • not a copied layout

Daily taste journal - Day 3

Target time: 15-25 minutes. Stop when the observation is clear.

Source image and URL

Three-second read: first event / second event / emotion

Three largest value groups

Estimated lens, camera height, and key-light direction

Dominant / supporting / accent color

One unnecessary element

On-set capture checklist

- ☐ RAW photography.
- ☐ Locked exposure where possible.
- ☐ Lens and focal length recorded.
- ☐ Camera height and distance recorded.
- ☐ Clean plate without model.
- ☐ Gray card and color reference.
- ☐ Chrome or reflective reference when available.
- ☐ Matte sphere or neutral object when available.
- ☐ Light-placement reference photo.
- ☐ Focus plates and background plate.
- ☐ Shadow reference and extra framing.
- ☐ Garment-detail and wrinkle photos.
- ☐ Product close-ups and alternate crops.

Capstone six-shot board

1. Model hero

2. Product still

3. Macro texture

4. Canadian environment

5. Clean commercial

6. Controlled experiment

Capstone adaptation matrix

Instagram portrait and square

Website hero and mobile hero

Story and poster

Email banner

Optional six-second teaser

Crop and product-truth risks

Final capstone rubric

Composition and hierarchy /20

Lighting logic /15

Material realism /15

Perspective and scale /15

Shadow and reflection integration /15

Color discipline /10

Product truth /5

Final course review

Strongest skill gained

Weakest visible failure

Best master-study lesson

What must be repeated before a campaign shoot

Which work is private study vs. publishable VORG work

Next 30-day practice plan
